NUTRITION TIP OF THE WEEK FROM THE KSC FITNESS CENTERS: Despite the fact that some diets have relegated the banana to the foods-to-be-avoided list, for those of us not limited by this prohibition, keep enjoying this popular fruit. Not only do bananas taste good, they're good for you! Here are some banana facts:

- Bananas contain about 23 grams of carbohydrates.
- A regular-sized banana contains only about 100 calories, and less than one gram of fat.
- Bananas are potassium-rich, each containing about 10 percent of your recommended daily allowance.
- Bananas can help lower your blood pressure.
- Potassium is also essential for helping muscles to contract properly during exercise and reduces muscle cramps.

With all these positive things going for it, the banana is here for most dieters to enjoy. Here are some recipes that call for bananas <http://www.alve.com/fun/bananas/recipes.html>. (TA-C2)
