NUTRITION TIP OF THE WEEK FROM THE KSC FITNESS CENTERS: Diabetes doesn't change the kinds of foods you eat. No matter what type of diabetes you have, the food choices you make are important. Smart food choices help keep your blood glucose level in good control. Poor food choices work against your efforts to stay healthy. Your meal plan must match your unique needs, that's why there is no one diabetic diet. Your food choices can help you prevent or delay side effects of diabetes such as kidney disease, gastroparesis (slow stomach emptying), high blood pressure, and heart disease by helping you control blood glucose levels. What are the basics of a nutritious diet for someone with diabetes? Nutrition means getting nutrients: protein, carbohydrates, fats, vitamins, and minerals from what you eat and drink. The amounts of carbohydrate, fat, and protein in your daily meal plan depend on your individual needs and tastes. They also depend on your overall health and your treatment goals (blood glucose, blood fat levels, and weight goals). Your nutrition needs change throughout life as your body changes. As your needs change, so should your food choices. Try to see a registered dietitian every 6 months to 1 year to help with meal plans. Good sources of recommendations for a registered dietitian are your primary care physician, area hospitals, The American Dietetic Association, and The American Diabetes Association. (TA-C2)

OIG: The Office of the Inspector General is the focal point within NASA for conducting audits and investigations to promote economy and efficiency and to prevent and detect fraud and abuse in NASA programs and operations. The OIG receives and investigates complaints or information about inefficiencies, mismanagement, or gross waste of funds; possible violations of law, rules, or regulations by NASA employees, contractors, or others; or substantial and specific danger to the public health and safety. The Inspector General will not disclose the identity of a person who provides such information without that person's permission, unless the Inspector General determines that disclosure is unavoidable during the course of investigation. NASA employees are protected by law from reprisal for making complaints or disclosing information to the Inspector General. At Kennedy Space Center, call: 867-4714, or call toll free: 1-800-424-9183, 24-hour answering service, or write: NASA Inspector General, P.O. Box 23089, L'Enfant Plaza Station, Washington, DC 20024. (OIG)

MISUSE OF THE NASA INSIGNIA: Use of the computer templates, containing the NASA Insignia, for the production of NASA letterhead in electronic form is not authorized and should be removed from all computer systems. The Associate Administrator for Public Affairs has requested all NASA centers use only the printed NASA letterhead stationery. "The use of computer file NASA Insignias to custom design stationery provides opportunities for image manipulation and standards degradation which will adversely reflect the professional image of the Agency." If not approved for specific applications, electronic images of the NASA Insignia ("meatball") should be removed from computer systems. (TA-E1)
